HARADA

Harada Industries (México), S.A. de C.V.

SCOPE OF INTEGRATED MANAGEMENT SYSTEM (SGI)

Harada Industries México produces Automotive Antennas, Coaxial Cable, Actuators and Amplifiers that meet the requirements of our customers and the final consumer. We receive technical support from Harada Industry Co, LTD (HIJ), Harada Industry of America (HIA) and Harada Industries Europe (HIE).

Our processes ensure compliance with all applicable regulations regarding environmental concerns. These efforts are carried out through programs derived from the evaluation of environmental aspects and impact, from the design of our products to the delivery to our customers in accordance with the standards IATF 2016:16949 and ISO 14001:2015.

The design of our products and the used materials comply with the regulations set by the automotive industry. We execute our manufacturing processes with strict control of generated waste with the intention of reducing pollution and the use of natural resources.

We participate actively in the development and dissemination of our integrated management system that includes the needs, requirements and expectations of the stakeholders (customers, collaborators, shareholders, partners, neighbors, government agencies and suppliers).

In Harada Industries México, we are committed to quality and care of the environment.
